The competitor has submitted a request for a technical waiver, related to series-required data monitoring equipment.

Due to an accident and a fault in the MOTEC SRO Lambda splitter, one of the two Lambda sensors is not correctly reporting data. After consulting with series technical staff and the MOTEC representative, it was determined that no replacements parts are available to remedy the fault during the event.

After consultation with the Technical Manager, the Stewards grant a one-event waiver for the No. 120 to compete for the remainder of the event.
