

**From:** The Stewards  
**To:** NOLASPORT No. 19 – Technical Waiver  
Driver: Stad & Travis

**Decision No:** GT4-02  
**Date:** 7/21/22  
**Time:** 4:41

**Team:** NOLASPORT No. 19

**Competition:** Watkins Glen

**Session:** All sessions

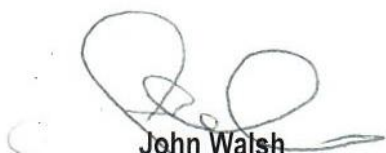

**Facts:** The team has requested a one event technical waiver for the series-required lambda sensor, and the Driver ID switch system. Due to an incident at the previous race that involved significant damage and a replacement chassis, required wiring harness systems cannot be reused and are not currently available.

**Supporting Documents:** Request Application WGI-RQ-2 – Request for a technical waiver

**Decision:** The stewards, having considered the matter, grant a 1-event waiver to the No. 19 to compete without the required lambda sensor, and without a working Driver ID switch with the following conditions:

The team must immediately notify a series pit lane official of any driver change during the weekend's on-track sessions.

The competitor is reminded of his right to appeal (Article 18) except the penalties which are not susceptible to appeal.
