

From: The Stewards  
To: Competitor's Representative No. 099 – Rotek Racing  
Re: Technical Waiver

Stewards Decision No: GT4-03  
Date: 20 May 2023  
Time: 09:01

The competitor has requested a technical waiver of the series regulation on required data systems lambda sensors. They conferred with the series Technical Manager who, after consultation with the manufacturer, determined that certain supply chain logistic issues have made the required components unavailable at this time.

The Stewards, having considered the matter, grant the No. 099 car a one-event waiver of the requirement for this sensor to be in place and operational.
